

As an Indiana resident I value the Indiana "Do Not Call List" and ask that the petition be denied and that the law and practice that has been in force over the past year or so not be changed or modified. I Do Not want telephone sales calls on my phone. I dropped my cell phone service as the made courtesy calls to my home phone that were unwanted. The junk that I am sent through the mail is just fine if they want to notify me of some sort of great offer. It is faster to clean out the mail box rather than the answering machine.

FCC keep up the good work and make our Airwaves safe to watch again.
